Version: _ one

This is to CERTIFY, as a result of multiple deplorable number of subjects being a woman. The 'deplorable' is the subject and whether the subject can be change to truly represent health and lifestyle.

As a heterosexual male, actresses and models with that of artists are being exposed to nude photography and public scrutiny of their bodies. As such their expertise is not reliant on any evidence that states it is not harmful for their personal relationships. With that it is filed as a research concept that cinematography, film in ALL forms, And photography in all forms to be of a health and living 'constant' where healthy outcomes can be understood.
